

Duct Design Questionnaire

Complete this worksheet and sketch page, then submit both to our design team.

Before you begin: Accurate measurements are essential. Measure twice and include the full contact information and shipping address for your project.

1. Contact & Project Information

Name	Company
Email	Phone
Project / Shipping Address	

2. Application

Material being collected or conveyed	Application / process
Dust collector make and model	Collector inlet diameter
Airflow requirement (CFM), if known	Operating temperature

3. System Requirements

☐ New system	☐ System expansion	☐ Replacement duct
☐ Indoor installation	☐ Outdoor installation	☐ Not sure
Number of machine drops	Approximate total duct length	
Ceiling / mounting height	Preferred duct material, if known	

4. Equipment Connections

5. Additional Project Notes

Map Your Space

Draw a rough plan view of your ducting application.

Project: _____

Include: dust collector location, each machine and connection size, proposed main duct route, branch lengths, floor-to-ceiling height, obstructions, and every relevant measurement. The sketch can be rough; the measurements must be accurate.
