

SD Automatic Blast Gate

Ordering Information

- When ordering, specify gauge (if non-standard), dimension, end styles and control circuit voltage. Material is Galvanized Steel.
- Operated by single acting compressed air magnetic cylinders, controlled by electrically connected solenoid.
- APPLICATION: Gates are used for industrial dust extraction where continuous extraction is not always needed and where manual control needs to be eliminated.

- Standard 120V control circuit and 75psi minimum air pressure. Optional 24V DC or AC control circuit available.
- All auto blast gates have cylinders with galvanized or SS body and steel rod. Single cylinder: 3" to 10". Double cylinder 12" to 24". Solenoid has plastic housing.

Reed Switch Assembly 1.06

- **Optional** position (open/closed) D-B54 sensing switch with indicator light.
- Assembly includes two switches, one indicating open position and one indicating closed position.
- Applies to both styles of Norfab Automatic Blast Gates.
